## General Terms and Conditions for Other 2025Q3 Promotions

- The promotional offers (the "Promotions") are applicable to policies issued in Hong Kong and Macau only.
- In order for customers to enjoy the Promotions, the insurance application must be submitted and received by YF Life Insurance International Ltd. ("the Company") during the Promotion Period for each respective promotion, and the application must be approved, with the initial premium payment and required insurance levy(ies) (applicable only to policies issued in Hong Kong) paid on or before the approval deadline for each respective promotion. The Promotions are not applicable to policies with back-dating arrangement.
- The applicable premium discount will be applied to each modal premium due and payable (including the premium for the basic plan and the supplementary benefits attached) within each policy year that is eligible for the Promotions. The calculation method of the premium discount amount for different premium payment modes are stipulated in the table below. If the premium discount amount is not an integer, it will be rounded to the nearest two decimal places. The insurance levy (applicable only to policies issued in Hong Kong) will not be included when calculating the premium discount.

Premium Payment Mode	Premium discount amount for each modal premium due and payable (Calculation Method)
Monthly Payment	= Monthly Premium x the applicable premium discount rate for the year
Quarterly Payment	= Quarterly Premium x the applicable premium discount rate for the year
Half-yearly Payment	= Semi-annual premium x the applicable premium discount rate for the year
Annual Payment	= Annual premium x the applicable premium discount rate for the year

- For promotions that entail annualized premium requirements, please refer to the table below for the calculation of the annualized premium.

Payment Mode	Annualized Premium Calculation Method	Payment Mode	Annualized Premium Calculation Method
Monthly Payment	= monthly premium x 12	Half-yearly Payment	= half-yearly premium x 2
Quarterly Payment	= quarterly premium x 4	Annual Payment	= annual premium x 1

- The premium discount is offered to each eligible policy; and where a customer has applied for more than one eligible policy, all such eligible policies shall qualify for the premium discount. However, the annualized premiums of these policies will not be aggregated when calculating the premium discount rate.
- Eligible policies must remain in force when each premium discount is applied. The policyowner will not be eligible for the premium discount if the approved policy is terminated for any reason, whereupon any unapplied premium discount amount (if applicable) will be forfeited. In case of a premium refund, any part of the premium payments that is offset by the premium discount may under no circumstances be counted as premium paid and will not be included in the refund amount.
- If the policyowner requests a change in the premium (including but not limited to a change of premium mode, reduced sum assured, and change of plan level) for the eligible policy within the first / second / third / fourth / fifth / sixth / seventh policy years (as the case may be), the First-Year / Second-Year / Third-Year / Fourth-Year / Fifth-Year / Sixth-Year / Seventh-Year premium discount rate (as the case may be) to which the policyowner is entitled will be recalculated based on the revised premium or annualized premium. In other words, after the premium change becomes effective, the entitled premium discount amount will be recalculated by multiplying the revised modal premium by the applicable premium discount rate. The Company reserves the right to request the policyowner to pay back the difference between the respective premium discount amounts.
  - If the eligible policy is a PIS and the policyowner exercises the right to split the policy on the first policy anniversary date, the premium discount rate for both the original policy and the split policy(ies) will be recalculated based on the revised annualized premium of each policy. In other words, after exercising the policy split, the premium discount amount to which each respective policy is entitled will be recalculated by multiplying the revised modal premium of each respective policy by the applicable premium discount rate.
- The premium discount offers under the Promotions will form part of the policy contract upon the respective policy and/or the respective supplementary benefit (if applicable) being issued provided the requirements of the premium discount offers under the terms and conditions of the Promotions are satisfactorily fulfilled.

9. The Company reserves the right to accept or reject any application for the insurance plan based on the information provided by the customer as the proposed policyowner and/ or the proposed life insured during the application.
10. For an eligible policy issued in Hong Kong, the insurance levy on the insurance premium to be collected by the Insurance Authority is calculated based on the premium after deducting the premium discount amount.
11. Under no circumstances are the Promotions exchangeable, redeemable for cash, or transferable to others or to other policy(ies).
12. The Promotions are not applicable to any customer who:
  - (i) has already submitted an application for a policy of the same plan type but withdraws or cancels any application, or
  - (ii) cancels any issued policy of the same plan type, or
  - (iii) reduces the premium of an approved policy of the same plan type, during the Promotion Period, and re-submits another new policy application for the same plan type within the Promotion Period (for definition of the "same plan type," please refer to the relevant clause under each Promotion).
